# Information on likely routes of exposure

**Product Information** 

Causes serious eye irritation May cause cancer May cause an allergic skin reaction May be fatal if swallowed and enters airways Harmful by inhalation, in contact with skin and if swallowed.

Inhalation	Inhalation of vapors in high concentration may cause irritation of the respiratory system. May cause central nervous system depression with nausea, headache, dizziness, and incoordination.
Eye contact	Severely irritating to eyes.
Skin contact	Irritating to skin. Repeated or prolonged skin contact may cause allergic reactions with susceptible persons. May be absorbed through the skin in harmful amounts.
Ingestion	Petroleum products have to be classified as harmful due to the aspiration hazard when the viscosity is less than 7 mm2/s at 40°C. Aspiration may cause pulmonary edema and pneumonitis. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. May cause additional affects as listed under "Inhalation".
